PROFESSIONAL SUMMARY

IT graduate and aspiring Software Engineer & Cloud Engineer with hands-on experience developing full-stack applications using React, TypeScript, Python, and backend technologies. AWS Certified Cloud Practitioner, Microsoft Azure Fundamentals, and Microsoft Azure Administrator Associate certified, with practical experience in cloud computing, application development, troubleshooting, and problem-solving. Passionate about building reliable software, managing cloud environments, and solving real-world problems through technology. Eager to contribute, learn, and grow in a Software Engineering or Cloud Engineering role.

EDUCATION

Advanced Diploma in Information Communication Technology
University of Mpumalanga — Present

Diploma in Information Communication Technology (Application Development)
University of Mpumalanga — 2021 to 2025

National Senior Certificate (Matric)
Northern Academy Secondary School — 2019

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Microsoft Certified: Azure Fundamentals
- Microsoft Certified: Azure Administrator Associate

TECHNICAL SKILLS

- Programming & Development: Python, Java, SQL, JavaScript, TypeScript, Dart, Node.js
- Frameworks & Tools: React, Vue.js, Flutter, Spring Boot, Tailwind CSS, HTML, CSS
- Cloud & Infrastructure: AWS, Microsoft Azure, Docker, Supabase
- Databases & Tools: MySQL, MongoDB, Git & GitHub, Excel, PowerPoint
- IT Support: Hardware and software troubleshooting, technical assistance, system deployment and monitoring
- Soft Skills: Problem solving, critical thinking, teamwork, communication, time management

EXPERIENCE

Technical Support Engineer — *Absa Group*
September 2026 - Present

- Monitor and troubleshoot cloud-hosted applications, virtual machines, storage, and other services on platforms such as Azure or AWS
- Provide technical support to Absa users and staff.
- Diagnosed technical issues and provided appropriate solutions
- Assist with the setup and configuration of computers and other IT equipment

Software Developer Intern — *4th Industrial Revolution Incubator (4IRI)*
March 2026 – September 2026

- Develop and improve software applications for clients while gaining practical experience in software engineering.
- Collaborate with other developers to troubleshoot issues, test solutions, and improve application performance.
- Apply problem-solving and teamwork skills to develop practical technology solutions and strengthen my foundation in Software Engineering and Cloud Engineering.
- Participate in the design, development, and deployment of software projects while learning industry best practices.

PROJECTS

Car Wash Booking & Management Platform

- Built a full-stack car wash booking application using React, TypeScript, and Supabase with real-time scheduling and queue management.
- Link: https://sparkle-shine-booking-main-e6v2.vercel.app/

Boka Mobile Detailing Website

- Built and deployed a responsive business website for a local client using Html, Css, Javascript and HostAfrica hosting, featuring service catalog, pricing, and invoice generation
- Link: www.bokamobiledetailing.co.za

Task Management System

- Developed a task management system using Python, MongoDB, and Tkinter, applying NoSQL database operations and GUI development, including troubleshooting and debugging application errors.
